

ENEOS ECO ATF

ENEOS ECO ATF is fully synthetic automatic transmission oil that provides superior fuel economy, improved oxidative & thermal stability, and excellent resistance to mechanical shear & fatigue.

ENEOS ECO-ATF Benefits

- Up to 2% fuel savings benefit* based on fuel consumption test results conducted at Southwest Research Institute
- Compatible with Japanese vehicles equipped with torque converter Automatic Transmissions**, including conventional 4-speed slip lock-up ATs, 5- and 6-speed automatic transmissions
- Outstanding friction characteristics provide the driver with a smooth and comfortable ride

*Comparison based on generic ATF with viscosity of 30 ~ 40 cSt @ 40°C

** Excluding CVTs (Continuously Variable Transmission). For CVT use, use **ENEOS ECO CVT Fluid**.

Part No.	Size
3103-300	Qt.
3103-400	6 Gal. Container
3103-110	55 Gal. Drum

ENEOS ECO CVT FLUID

ENEOS ECO CVT FLUID is a fully synthetic continuously variable transmission fluid that provides superior fuel efficiency, ensures longer drain intervals, and optimizes noise reduction.

ENEOS ECO CVT FLUID is formulated to meet the quality requirements for many types of Asian CVTs, and is applicable for both belt and chain pulley types of CVTs.

Part No.	Size
3026-300	Qt.
3026-400	6 Gal. Container
3026-110	55 Gal. Drum

ENEOS Gear Oil GL-5 75W-90

ENEOS Gear Oil GF-5 75W-90 is a premium gear oil using the latest sulfur-phosphorus technology that ensures superior performance in every area required of manual transmissions and differential gears. This additive technology assures excellent protection of the gears against metal-to-metal contact under the most severe conditions, including shock-loads.

ENEOS Gear Oil is recommended for use in bevel, spiral bevel and hypoid gear type differentials, and power dividers. It is compatible with synchromesh transmissions, ensuring easy and smooth shifting even at very low temperatures.

Not suitable for Limited Slip-Differentials

Part No.	Size
3092-300	Qt.

Note to Users: The information contained in this reference guide is provided as a general usage guide, based on the most current information available. You should always consult your vehicle owner's manual or check with the manufacturer to verify the proper fluid recommendation for your vehicle.
