

DID YOU KNOW?

CVT LUBRICANTS

What kind of CVT fluid should you get for your vehicle?

If you drive an Asian vehicle with a Continuously Variable Transmission (CVT), you may be wondering what type of fluid you need for the transmission, or specifically, whether you need to purchase the manufacturer-produced fluid.

For CVTs with specific fluid requirements, it is recommended owners use either "genuine" fluids, or fluids created by professionals who have close relationships to OEMs and are capable of producing lubricants that meet the manufacturer's CVTF requirements.

How do you know transmission fluid is failing/degrading?

You may experience:

- Reduced acceleration
- Reduced fuel efficiency

Degraded transmission oil can lead to **transmission failure** if not promptly corrected.

PURPOSE OF TRANSMISSION FLUIDS

ENEOS

www.eneos.us/products

ENEOS IMPORT CVT FLUID

Transmission fluid engineered specifically for your Asian vehicles.

ENEOS Import CVT provides OEM-quality products that meet the specific requirements of select Asian CVTs.

- Formulated with high-quality synthetic base oils combined with unique additives
- Provides outstanding compatibility and performance for all service fill requirements

ENEOS ECO CVT FLUID is available for Nissan, Infiniti, Honda, and Acura vehicles where the indicated genuine fluids are specified.

Import CVT Fluid	MODEL N	MODEL H
	Nissan and Infiniti vehicles that require Nissan NS-2	Honda and Acura vehicles that require Honda CVT Fluid and HCF-2
	PART# 3057-300	PART# 3072-300
