

ENEOS e-AXLE FLUID

TOP EFFICIENCY FLUID FOR EVs AND HYBRIDS

ENEOS e-AXLE FLUID TE (3010-311)

- ✓ Designed specifically for e-Axle electric drive units
- ✓ Factory fill supplier for major OEMs
- ✓ Supports cooling, range efficiency, and electrical insulation
- ⚠ Not interchangeable with ATF WS

WHY ENEOS e-AXLE FLUID TE?

- OEM factory fill quality
- Growing EV/Hybrid service category
- Simple add-on with high customer value

Compatible with e-Axles requiring "Toyota Genuine e-Transaxle Fluid TE"*

SERVICE OPPORTUNITY

OEMs list "no scheduled change" for normal use — but most driving is considered severe (short trips, stop-and-go, heavy loads).

Recommended dealer guidance:

- Every 40,000–60,000 miles (normal)
- Every 30,000–40,000 miles (severe)

Regular changes protect motors, inverters, and insulation materials.
